## MITRE'S SUPPLY CHAIN KEY PERFORMANCE INDICATOR (SCKPI<sup>TM</sup>): A NEW APPROACH TO SUPPLY CHAIN RESILIENCE METRICS

The MITRE Supply Chain Key Performance Indicator (SCKPI<sup>™</sup>, pronounced Skippy) tool helps supply chain resilience stakeholders quickly identify indicators relevant to supply chain resilience risks and orient strategic resilience goals towards objective performance measures.

While the current key performance indicators (KPI) landscape in the supply chain domain is largely concentrated around industry's profit-focused metrics, this framework organizes KPIs with the goal of evaluating critical supply chain resilience at the national level.

SCKPI was developed in collaboration with dozens of MITRE supply chain subject matter experts and serves as the basis for an ongoing effort to re-orient industry profit-seeking KPIs towards a whole-of-nation resilience focused approach. KPIs are organized within SCKPI by risk type, supply chain phase, and timeframe and are accessible via an easy-to-use user interface. SCKPI helps government sponsors drive resilience strategy that targets their mission-specific goals for supply chain.

SCKPI is currently a prototype. If you are interested in participating in a SCKPI pilot, contact us to learn more at **supplychainsecurity@mitre.org**.

## **SCKPI ESSENTIALS**

SCKPI is an interactive Tableau Dashboard designed to assist decisionmakers in identifying the most relevant KPIs for their needs. It serves as a comprehensive framework for organizing these KPIs and establishes a common language for engaging with stakeholders across the supply chain domain.

## **HOW IS IT USED?**

Users can view total KPI counts across various categories and select specific KPIs of interest. By hovering over individual KPIs, users can access concise definitions and formulas, as well as explore related categories within the taxonomy. The dashboard allows for filtering KPIs by parameters such as the "Logistics" risk category and the "Deliver" supply chain phase. Additionally, it provides definitions for all risk categories and supply chain phases, enhancing user understanding and facilitating informed decision-making.

MITRE's mission-driven teams are dedicated to solving problems for a safer world. Through our public-private partnerships and federally funded R&D centers, we work across government and in partnership with industry to tackle challenges to the safety, stability, and well-being of our nation.
