Leveraging the Extended Enterprise with Social Software

Boston SIMS  September 2012

Donna L. Cuomo, PhD
CI&T Chief Information Architect
The MITRE Corporation
Outline

- Strategy for Social Business Networking
- Overview of Handshake
- Business Value Assessment
  - Usage Metrics
  - Case Study Interviews
  - Value Survey
- Value Stories
- Future Plans for the Extended Enterprise
- Take Aways
The MITRE Corporation

- MITRE is a private, not-for-profit organization chartered to work in the public interest
- Founded in 1958 to provide engineering and technical services to the U.S. Air Force
- Currently manages 5 Federally Funded Research and Development Centers
  - Department of Defense
  - Federal Aviation Administration
  - Internal Revenue Service/Department of Veterans Affairs
  - Department of Homeland Security
  - Federal Judiciary
- Supports a broad and diverse set of sponsors within the U.S. government, as well as internationally

7,500 employees worldwide
Supporting Strategic Relationships and Multi-Organizational Collaboration
State of the Practice in 2009 …

- Social networking tools were proliferating on the internet
- Most enterprises were deploying social networking tools for *internal use only* or for *consumer product users*
- It is difficult to measure objectively how social tools impact individuals, communities, and the enterprise
2007: MITRE-Babson Research…
Social Technology Matters!

- It’s not just frequency of use that is important with these tools, but rather, who you are connecting to
  - **Uniqueness of the connections adds the value**

- Brokerage, in both social networks and technology-mediated networks, has a positive impact on personal innovativeness

- Both of the technology networks (ListServ and social bookmarking/tagging) provide unique, significant value

- The social network & the technology networks complement each other
State of the Practice in 2009 …

- Social networking tools were proliferating on the internet
- Most enterprises were deploying social networking tools for *internal use only* or for *consumer product users*
- It is difficult to measure objectively how social tools impact individuals, communities, and the enterprise

- Deployed a single open source platform (Elgg) to support both *internal* and *cross-organizational networking*
- We are now entering our 3rd year and performing a *longitudinal business impact evaluation*
The Extended Enterprise Challenge

Flexible and Secure Architecture
Handshake: Social Business Networking

Groups create spaces for communicating on topics and collaborating on files / wiki pages.

Home page provides awareness of users’ network activities.

Profiles allow users to share information at item-level access control.
Tool Customizations & Adaptations

Goals: remove barriers, accelerate adoption, encourage good behavior

- MITRE identity model with single sign on
- “Box Model” for group permissions
  - Restricts contents to group permission level ceiling
- Visualized permissions & access
- Connect vs follow; follow groups by default
- Group activity river
- Email notifications, respond via email
- Group metrics
- Colleague recommender

Released to open source community
Handshake on our Intranet Homepage
Longitudinal Evaluation Methodology

Hypothesized that business networking tool use:

■ **Social capital**
  - Reinforces existing business connections
  - *Fosters* development of new business connections (enhancing innovative behavior)
  - *Expands* access to technical/domain expertise (internally and externally)

■ **Intellectual capital**
  - *Increases* staff’s awareness of emerging technology and new industry trends
  - *Exposes* staff to new and innovative ideas

■ **Ability to collaborate** more effectively
  - Across distributed project teams – span distances
  - *With* MITRE’s partners and other stakeholders

■ **Crowd sourcing**

- Instrument the platform for activity and social demographics over time
- Usage metrics reporting
- Handshake value survey
- Social and intellectual capital survey baseline
- Use case studies, over time
- Anecdotal stories from end users
- Visualization of key networks over time
Case Study Interviews

- 63 interviews with internal and external members of Handshake, face-to-face or on phone
- Interviewers followed loose script to engage participants in open-ended questioning
- Focus of interview was on perceived benefits from participating in Handshake groups

Perceived Benefits

- Facilitates cross-organizational communication and collaboration
- Improves situation awareness of critical project information
- Consolidates multiple types of information in a single location
- Enables crowd-sourced support for innovative ideas and product features
- Helps expand and strengthen business relationships
- Enhances product quality and team productivity
Interview Results: Perceived Benefits

- Facilitates cross-organizational communication and collaboration
- Improves situation awareness of critical project information
- Consolidates multiple types of information in a single location
- Enables crowd-sourced support for innovative ideas and product features
- Helps expand and strengthen business relationships
- Enhances product quality and team productivity

- *Having [application users] talk to each other has value to the product team. [It] helps develop more polished software faster and better.* – Application Developer

- *These types of discussions opened up team members’ minds to alternative designs and solutions, improving the product and changing their thinking.* – Application Developer
Interview Results: Perceived Benefits

- Facilitates cross-organizational communication and collaboration
- Improves situation awareness of critical project information
- Consolidates multiple types of information in a single location
- Enables crowd-sourced support for innovative ideas and product features
- Helps expand and strengthen business relationships
- Enhances product quality and team productivity

- *There is something about seeing the photos that makes you feel closer to the group… it motivates you [to contribute] if you see the pictures.* – Senior MITRE Manager

- *The relationship building that Handshake permits seems to be richer than what you find on ListServ… helping solidify relationships… Now at a conference, we recognize each other and can talk.* – External participant
Interview Results: Perceived Benefits

- Facilitates cross-organizational communication and collaboration
- Improves situation awareness of critical project information
- Consolidates multiple types of information in a single location
- Enables crowd-sourced support for innovative ideas and product features
- Helps expand and strengthen business relationships

Enhances product quality and team productivity

- *It definitely improved the quality of the products because you have instant feedback* [about a design feature]. – Customer team member

- *Handshake helped reduce the number of iterations we had to go through to get to the final product. It would have taken much longer, many more iterations without it.* – MITRE member of cross organizational project

- *Handshake saved me lots of time because, at any given time, I knew what was going on in the project.* – Customer Program Manager
Handshake Value Survey

- Survey was designed based on input from interviews
- Survey was sent to all 4600 MITRE Handshake members
- Survey construct
  - 18 Likert-scale statements on Handshake usefulness in:
    - Supporting collaboration
    - Strengthening social connections
    - Fostering situation awareness
    - Facilitating management of knowledge assets
    - Enhancing productivity
  - 4 open-ended questions pertaining to:
    - Overall value of Handshake to their work
    - Value of specific Handshake groups
    - Barriers to Handshake adoption
    - Suggested improvements
Survey Analysis Results

- Active contributors realize more benefits
- Even consumers, however, report benefits

Support for Business Networking

Support for Collaboration

Handshake Uses

MITRE Organizations

Social

Project Pages

Application Support

Affiliation or Network

Industry Engagement

Academic Engagement

Communities of Practice

Projects
Interesting Uses of Handshake

Crowd sourcing identification of people in old photos

Discussion lead to a grass-roots organized science fair!

Group with mission users in field

Less than 24 hr turn around time for mods to mobile apps.
Interesting Uses of Handshake

Social Media

Request for take aways from Enterprise 2.0 leads to high-level sponsor commenting on briefing; people we didn’t know were at conference join in!

Participants are self-identified

MITRE/Customer Team

Distributed team
Dynamic staffing
Aggressive timeline for deliverables
Constant communication/sharing

“At any given time, I knew what each member of the group was thinking, planning, or doing.”

“Handshake was extremely effective in resolving issues as they occurred, disseminating information, and meeting deliverable deadlines. The importance of Handshake’s capabilities was magnified under the aggressive schedule and tight time constraints of the project.”

Self-Joining Groups

Communities of Practice
Affiliations
Peer Support
Social Groups

“I find it refreshingly open in the sense that people are asking questions and posting ideas.”

“I really like the inclusiveness of it. I like the different perspectives. Each company comes with different culture as well as individuals.”

community on Handshake

231 members, 45% contributing
128 discussions, 185 comments
biggest activity “spike”

“Colorado Springs Fire
Crisis Response Support”

“The quick set up and operational support
Handshake provided was very valuable… We
could keep a wide audience informed about
evacuations etc without risking leaving anyone
out.” - COS Site Leader

“You can do more on Handshake, such as
upload photos and maps, and categorize things
- COS HR

“It was a great meeting place,” she says. "For the
folks who were being evacuated, it was a comfort,
knowing they could go to one place for information
on who could house them or their pets or horses,
without having to go through tons of emails. - COS
Office Coordinator

Integrated notification service
Take Aways

Think about the networks that you want to build in your enterprise and across the extended enterprise
  - What goals do you have for them?
  - What would help sustain them?

What processes do you have today that would benefit from being “social-enabled”?
  - E.g., Sponsors invited into research strategy prioritization, innovation research program process, early responders, internal strategy discussions, crowd-source supported products…
  - It’s a “process/outcome discussion”, not a “tool” discussion
  - Is “community” integrated with your content strategy?

Do not read/post to the same people all the time
  - Connecting with a non-redundant set of people is more valuable
Take Aways

- Develop on-boarding work & human resource development practices that focus not only on project success, but also relationship building
  - Pair newcomers with “brokers” in a mentoring relationship
  - Design initial projects with not only success in mind, but also relationship building as an outcome
  - Performance reviews should include not only what have you accomplished but who have you met and built a relationship with
  - Groom future brokers through job rotation
  - Recommend communities new employees should join

- Make employees aware of the social tools and the potential benefits
  - Communicate the value stories and successes of others
  - Train community stewards on successful techniques for community and network management

- Value social networking engagements (posts, status updates, information sharing, starting interesting discussions)
